## DOUBLE CONTACT AB SORBER FOR HIGHER SO<sub>2</sub> CAPTURE EFFICIENCY

- This unique absorber has higher efficiency and less liquid consumption than the competition
- It has been the leading choice of coal fired power plants

# Double Contact Absorber for Higher Efficiency

- Both spray towers and the Double Contact absorber are offered for limestone FGD
- The slightly higher increase in fan energy is offset by decreases in pump energy
- Clients have the benefit of the MHI knowledge and support plus the service of the local MHI partner in many major countries
