- VHP as part of clean air initiative

VHP Contamination as Part of Clean Air Initiative

- Cleanroom expertise is crucial for cell and gene therapy production—and cleanrooms are Ecolab's specialty. Our cleaning and disinfection innovations put biopharmaceutical manufacturing companies at the forefront of compliance, product safety and operational excellence.
- Validated Products and Processes
- Optimized production through standardization
- Certificates of Analysis available for all chemical SKUs and Bioquell bio-decontamination products
- Decontamination services for commissioning, planned production changes or emergency response
- Vaporized hydrogen peroxide decontamination for a variety of room setups and applications
