Outsourcing weighing and dispersing for  
increased capacity

# ILC Dover Weighing and Dispersing Outsourcing

- The gene therapy division of a major pharmaceutical manufacturer was looking for ways to overcome capacity constraints due to the increased production demands for process liquids and buffers. Non-core manufacturing activities, including the weigh and dispense steps in the process liquid and buffer preparation, were identified as bottlenecks impacting the overall production schedule. The proposed solution would provide ready-to-hydrate, trustedweight dry powder chemicals. Read how the customer benefited from the procurement of larger lot sizes that were not capable of being handled within their facility, resulting in annual savings for raw materials and QC testing.
