- Preassembly for cost effective filtration

# Preassembly for Large Scale Single Use Filtration

- Maxicaps<sup>®</sup> MR is a unique, pre-assembled, single-use, large-scale filtration unit that reduces connections and complexity while allowing multiple configuration options for seamless process integration. The novel design provides integrated fluid distribution using 80% less tubing and only two process connections. This decreases the risk of faulty connections by up to 90% and shortens installation, test, and dismantling time by up to 87%.
- Maxicaps<sup>®</sup> MR represents a new way to perform large-scale single-use filtration for clinical and commercial scales. It enables fast and easy installation, minimizes the number of components required, and mitigates risk in a novel, compact design.

# Sartorius Process and Products in Multiple Value Propositions

- For the biopharmaceuticals industry, Sartorius offers a comprehensive, globally unique program of products and services, ranging from the discovery of active pharmaceutical ingredients to process engineering, from scale-up and production to compliance with regulatory steps.
