Tubing designed to withstand pressures of peristaltic pumping

Saint - Gobain

- PharMed[®] BPT tubing has been formulated to withstand the rigors of peristaltic pumping action while providing the biocompatible fluid surface required in sensitive bioprocess applications.
- PharmaPure[®] is a premium, low spallation, biologically compatible peristaltic pump tube developed especially for pharmaceutical applications
- PureFit[®] SPT-60 L is a pharmaceutical-grade, platinum-cured silicone tubing developed for accurate dosing in peristaltic pumps used for transfer of high-purity liquids and sensitive biologicals. It features an inner surface smoothness that inhibits protein binding and bacterial growth and simplifies sterilization and sanitation
