- **PRODUCT** Valve
 - **INDUSTRY** Semiconductor
 - **VALUE PROPOSITION** PFA lined isolation and control valves for process fluids
- 

Valves for Semiconductor Water

- Bray's Comprehensive line of valves, actuators and accessories are engineered, and field proven for demanding applications in semiconductor wafer fabs, where crevice free surface finishes up to 5 RA, guaranteed passivation of wetted surfaces, and reliability are mission-critical to the chip manufacturing process. Bray's specialized PFA Lined isolation and control valves are ideally suited for wet process fluid, and reduced particle shedding in manufacturing the next-generation of sub-10 nm microchips.
