

Syntegon

Value Proposition 1177

Product UPW systems

Industry: Pharma

Value Proposition: Modular system is most cost effective

Modular and Highly Flexible

- Syntegon offers a modular, highly flexible solution for the generation of pharmaceutical-grade pure water (PW) and high purity water (HPW). Employing a full range of technologies including multi-layer filtration and ultrafiltration, as well as physical-chemical processes including reverse osmosis and electrodeionization, our PWGU systems are configured to precisely address your individual requirements. Featuring a small footprint and height in all configurations for easy drop-in installation, the modular design is highly hygienic and accessible, making maintenance quick and easy.
