

Lee Industries

- Industry: chocolate
- Product: Valves
- Value Proposition: 316L Stainless valves are providing sanitary protection along with high performance
- # 1206

Lee Sanitary Valves are precision made of Type 316-L stainless steel and are designed for corrosion resistant, highly sanitary conditions in the food, drug, cosmetic, pharmaceutical, beverage, chemical and metal-detection industries worldwide. They are 3A Sanitary and USDA-M&P accepted and certified.

Our 3A Sanitary Valves are used for a variety of food and beverage products including meats, condiments, juices, flavors, oils, sauces, syrups, soups, bouillons, jams and jellies, chocolate and confectionery and milk products. Lee sanitary valves also are used for many cosmetic, chemical and pharmaceutical formulas. All Lee valves are available with various optional connection fittings such as sanitary clamp, sanitary thread, I-line, flanged, butt-weld and NPT.
