

 **PropStream**<sup>®</sup> Integrated Proppant Logistics

THE SAFEST AND MOST FLEXIBLE LAST MILE  
SOLUTION FOR HYDRAULIC FRACTURING

## PropStream Integrated Proppant Logistics

PropStream is the premier last mile proppant logistics solution with unrivaled flexibility.

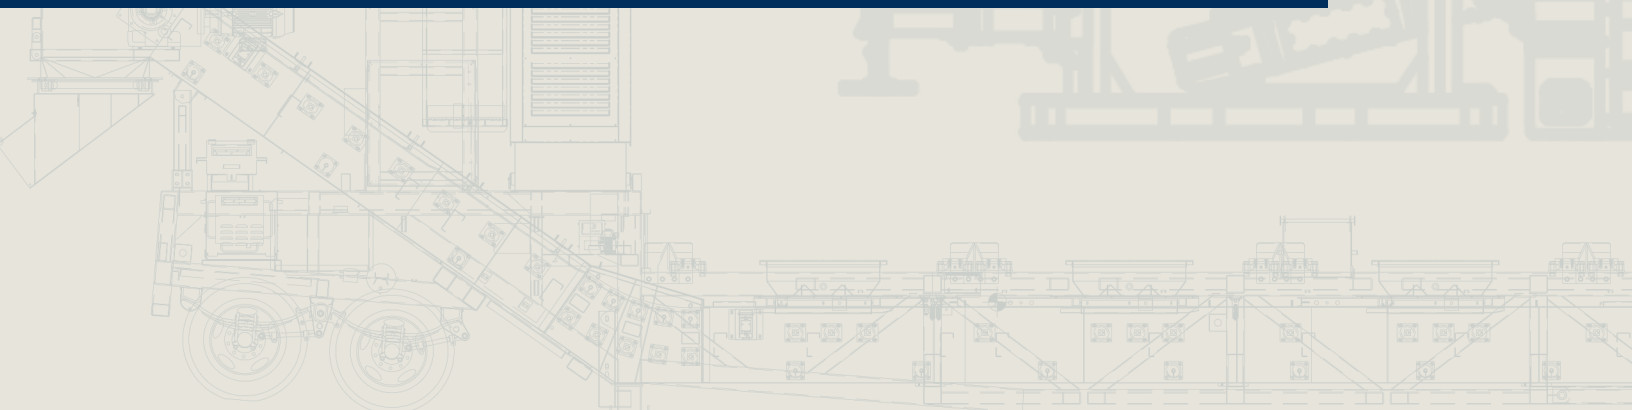

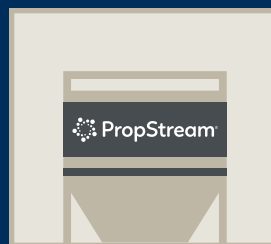

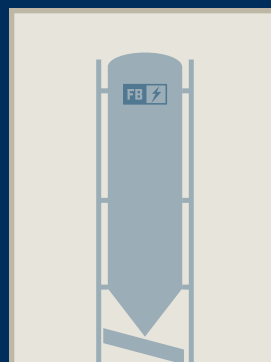

Silo or Container?

**PropStream provides both.**

Our innovative, purpose-built technology lets you *customize last mile proppant supply* to your specific requirements. PropStream helps eliminate supply risk and improve efficiency with the industry's only fully integrated solution offering both silo and container systems.

*Choose the best solution for your job.*

Silo or container, PropStream delivers unmatched flexibility for proppant logistics with industry-leading efficiency and HSE performance.

# PropStream<sup>®</sup>

Unrivalled flexibility  
for the best last  
mile solution

**>90%**  
**Reduction**  
of silica dust emissions,  
meeting OSHA PEL  
regulations

**<10**  
**Minutes**  
on and off wellsite  
with efficient  
proppant  
delivery

**6**  
**Perfect**  
wellsite safety audits  
from a major  
operator in the  
Permian

## FB SILO SYSTEM

*The ideal choice for multiwell operations and high proppant intensity well completions*

- ▶ Easy setup in two hours
- ▶ Maximum onsite storage
- ▶ Minimal footprint
- ▶ Innovative top fill option
- ▶ OSHA-PEL-compliant dust control

### **Optimize the pad with more proppant tons per square foot**

Manage large sand quantities or high rates in a small footprint. A single 6-pack silo configuration *increases wellsite storage more than 28%* versus competitor silos.

### **Customizable wellsite configurations meet any space requirement**

A variety of silo configurations and sizes, and crane-free hydraulic lift and transport, provides *maximum flexibility and improves safety*.

### **Flexible fill options provide ultimate wellsite versatility**

The FB silo system provides flexible, high capacity proppant delivery options using hopper bottom and pneumatic trailers. An innovative conveyor system, *FB Atlas*, speeds unloading while a state-of-the-art telescopic discharge tube *top-fills silos in about 1/6th the time* of traditional pneumatic systems.

**Reduced  
wellsite  
noise, exhaust  
and truck  
traffic**

# PROPSTREAM CONTAINER SYSTEM

*The ideal choice for single-well pads and challenging wellsite locations*

- ▶ Optimized wellsite footprint
- ▶ Enhanced mobility and flexibility
- ▶ Reduced trucking costs
- ▶ Fast loading and unloading
- ▶ Precise, accurate volume control

## Adapt to the wellsite

On single-well locations and when pad access is difficult or limited, PropStream containers are a compact, flexible logistic solution that *optimizes delivery and wellsite footprint.*

## Reduce trucking costs, congestion

Each flatbed truck delivers up to 25 tons of proppant in two easily handled, small-footprint containers. Container delivery can *cut the number of onsite trucks in half.*

## Achieve superior accuracy and reliability

Precise sand delivery and flexible inventory management *enable optimal performance.* Individual, QR-coded containers reduce the risk of product contamination and stranded product, and preserve proppant integrity and mix flexibility at the blender.

## Load and unload faster

Gravity fed loading and unloading results in faster operations and greatly reduces proppant degradation. Container mobility can have *trucks on/off site in less than 10 minutes.*

## FB Atlas™: Innovative Proppant Conveyance Loads Silos Faster

The FB silo system enhances truck-to-silo proppant transfer with the innovative FB Atlas conveyor. FB Atlas technology top fills silos 80% faster than conventional conveyance systems using a unique telescopic swivel discharge. The totally enclosed, OSHA-PEL-compliant system significantly reduces silica dust exposure to personnel and equipment. The entire system has a flexible configuration to minimize wellsite footprint. FB Atlas is the result of our commitment to continual innovation through robust research and development.

## PropStream Integrated Proppant Logistics

PropStream is the right last mile solution for every aspect of proppant supply management. Our fully integrated supply chain simplifies proppant procurement and provides the safest, most efficient service on the market. The flexibility of our last mile offering delivers the service you need—tailored to your particular wellsite application—when you need it.
